OAK

The oak is often said to be the king of trees, with good reason. It is one of the most beloved types of wood in the world. The oak symbolizes strength, power, knowledge, and resilience. It is a precious wood with a specific and unique appearance, which makes it recognizable and highly valued.

Due to its longevity and natural beauty, oak wood is very popular in the furniture and flooring industries, as well as used for many other types of wood products.

The authentic structure of oak makes it suitable for both traditional and modern interior design styles.

WOOD FUMING

All of our flooring options also come in a dark - fumed version.

Wood fuming is a treatment which darkens the wood. Depending on the length of the process, it is possible to achieve a wide range of colors, from very light, beige tones to very dark, nearly black tones. This treatment does not alter the mechanical properties of the wood, nor create any scraps.

This treatment involves changing the color of the wood not only on the surface, but also in its interior. Therefore, fumed wood products may be sanded or shaped without losing the resulting color. For example, in the case of fumed parquet, it will not change its color when it needs to be sanded after being mechanically damaged and scratched over time.

OTHER PRODUCTS

LAMELLA

Type of wood: Oak
Top / Wear layer for composition of multilayer flooring
Finish: Sanded

Standard thickness: 3.2 and 4.2 mm
Available in a variety of sizes and classes

FINISHED INDUSTRIAL PARQUET

Plank dimension: 14x160x500 mm
Lath width: 21.66 mm

PROPERTIES

1. Fully finished product
2. Solid oak parquet
3. May be oiled at the customer's request
4. Improved technical characteristics
5. Stable and long-lasting parquet
6. Quick and easy installation
7. Suitable for all types of residential and commercial spaces
8. Retains original appearance for many years due to the way it is joined

BRIQUETTE

Pini Kay — octagonal briquette with a hole

Type of wood: 80% oak, 20% beech

Dimensions per piece: 63/68x265 mm

1 package = 10 pieces = 10 kg

1 palette = 96 packages = 960 kg

PROPERTIES

1. Burns for two hours
2. Releases a very small amount of ash (1%)
3. High caloric value (6025 kWh/kg or 21690 kJ/kg)
4. Suitable for all types of furnaces
5. High temperature is reached quickly
6. 100% natural product (eco-product)
7. Requires very little storage space
8. Compact product, does not shed and does not create waste in storage
9. Easy to clean and maintain the oven

FURNITURE ELEMENTS

Type of wood: Oak

Flexibility in production:

- Dimensions
- Surface treatment
- Finish

Furniture position designed per customer's demand

ABOUT US

Delfin Trgotrans d.o.o. is a family business from Bosnia and Herzegovina that has been operating successfully since 1996.

Our mission is:

To turn wood into high quality products to satisfy our customers' wishes and solve their problems, while thinking about the environment and wisely using limited forest resources.

In our company, we process wood from the initial stage all the way to the end product. We export over 90% of our output into European countries like Sweden, Austria, Switzerland, Italy, Slovenia, Croatia and many others.

We nurture a close relationship with our customers based on mutual trust and respect. The fact that some of our partnerships have lasted for over 15 years speaks to that. Our goals are customer satisfaction and long-term collaboration.

OUR VALUES

D
E
L
F
I
N

DEDICATION

Since starting our business we have been dedicated to delivering the highest quality product in the shortest possible time. Dedication to our work, listening to the market and nurturing relationships with our clients are the key aspects of our business, which contribute to the growth and development of our company.

EMPATHY

Some of the basic tenets of our company include understanding our customers and their wishes, as well as striving to make their wishes reality. Apart from that, understanding society and social responsibility play a key part in all of our business decisions.

LOYALTY

Loyalty to our customers, partners, employees, and community is incredibly important for building healthy relationships. We nurture long-term relationships and focus on fair collaboration with all interested parties.

FLEXIBILITY

Flexibility is important to our customer. Each customer has different wishes. Our company strives to adapt the product to the needs of our customers, with the goal of keeping them happy.

INNOVATIONS

We introduce new work methods, equipment and technology in order to improve the quality of our products and make our employees' work easier. Innovations facilitate production, which opens the door to hiring a growing number of women. Gender equality is important to us, and for the most part we achieve it through innovation.

NATURE

We are inspired by nature. We conserve it by using limited forest resources sparingly. All leftover raw materials are processed and reused for making other products, which lets us avoid unnecessary deforestation and make our contribution to the conservation of our environment.
